

Moldvai Foundation Scholarship

The Moldvai Foundation was founded by 2009 Dublin High alumnus, Noel Moldvai, to enable young STEM superstars. After graduation as Valedictorian, he went on to study Electrical Engineering and Computer Science at the University of California, Berkeley, where he was a published Astrophysics researcher. He later worked at Google and Microsoft, has multiple patents pending in distributed systems and is currently a Software Architect at Rubrik. As an immigrant, he believes in the power of STEM education to bootstrap confidence in young people of all backgrounds and empower them to be successful. The goal of the Moldvai Scholarship is to support students not just through their first year after high school, but to provide mentorship and networking for the rest of their education and career. The recipients of the Moldvai Foundation Scholarship are:

Ekansh Agrawal

Xiluo He

Aditi Jagannathan
