

# *Biomedical Academy*

We would like to acknowledge our Health Science and Medical Technology Academy class of 2020. These students have demonstrated a dedication to STEM education by choosing elective Project Lead The Way Biomedical courses. Many have also participated in our Dublin High School Biomedical Mentor Program for juniors. All have done substantial career exploration and have successfully completed 6 to 8 lab science classes over the last four years, in which they learned valuable skills in laboratory techniques, problem-solving and communication. In addition, many students have participated in site-based internships at local hospitals and medical offices.
